PROFESSIONAL SUMMARY

BSIT graduate with a passion for UI/UX design and frontend development. Skilled in designing responsive interfaces and implementing user-centered web applications.

PROJECTS

AniKwento: AI-Powered Tales | Developer

June 2024 - June 2026

- Role:** Contributed to the development of an AI-powered educational storytelling platform, focusing on frontend development, UI implementation, documentation, and design quality assurance.
- Tools:** PHP, Java, JavaScript, HTML, CSS, MySQL, GitHub, UML, ER Diagrams.
- Product:** Developed frontend features supporting AI-generated educational stories and teacher profile management within a web-based learning platform.
- Architecture & Impact:** Designed the MySQL database schema for the Teacher Profiles module and created flowcharts, ER diagrams, and UML diagrams to model system processes and data relationships. Developed responsive user interface components while contributing to technical documentation, design quality assurance, and Agile team collaboration using GitHub version control.

IDEase | Developer

March 2026 - May 2026

- Role:** Contributed to the redesign and development of IDEase, a modernized identification card management system developed as part of my internship at Rakso Computer Technology.
- Tools:** Figma, HTML, CSS, JavaScript, MySQL, Flowcharts, UML Diagrams.
- Product:** Contributed to developing a more intuitive and user-friendly alternative to the existing CardExchange system, focusing on interface design and workflow efficiency for ID creation and management.
- Architecture & Impact:** Helped establish the product's identity by contributing to the application's name and initial interface designs in Figma. Created the project's system flowchart and handled the frontend implementation of the Records page while collaborating with the backend developer to deliver a consistent and user-friendly interface.

SKILLS AND EXPERTISE

Technical Skills

- Frontend Development :** HTML5, CSS3, JavaScript, Laravel (Basic), MySQL
- UI/UX Design & Systems Analysis:** Figma, Wireframing, Prototyping, Responsive Web Design, UML, Flowcharts
- Tools & Platforms:** Git, GitHub, VS Code, Microsoft Office
- Quality Assurance & Testing:** Manual Testing, Defect Reporting, User Acceptance Testing

Professional Skills

- Collaboration:** Team Collaboration, Cross-functional Communication, Technical Documentation
- Project Development:** Agile Methodology (Scrum), Version Control Practices, Software Development Lifecycle
- Core Competencies:** Front-End Development, UI/UX Design, System Analysis & Design, Quality Assurance, Database Design

EDUCATION

University of Batangas

Bachelor of Science in Information Technology

August 2022 - July 2026

AWARDS & CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations & Cloud Architecting
- 3rd Place - Hack the Future @ Phil. Innovation Conference 2025
- CompTIA IT Fundamentals+ (ITF+) Certification
